

Website Hosting Options

- **GoDaddy**

- <https://www.godaddy.com/>
- \$12 for a website domain and hosting, per year

- **Cal Poly Servers**

- Ssh into cal poly server
- Create a directory named “www” in your home directory
- Run these commands to give your directory the needed permissions:
 - `chmod a+x www`
 - `chmod a+r www`
 - `chmod a+x .`
- And you're good to go!
 - To test that your website works:
 - Create a file in the www directory called “index.html”
 - Put in code like:
 - ```
<!-- Sample index.html file -->
<html>
<head>
 <title> My Web Page </title>
</head>
<body>
 <center> Hello World </center>
</body>
</html>
```
    - Then view your site:  
<http://users.csc.calpoly.edu/~yourCpUsername>
  - Trouble shooting: you may need to give index.html permissions:
    - `chmod 644 index.html`
